

# SUCCESS STORY

## Winslow Activity Club

Winslow Activity Club is a charity offering activities for adults with physical / learning disabilities and autism, including massage, music, art and sensory projects one morning a week, in a relaxed and caring environment.

They have taken advantage of the services provided by Community Impact Bucks on a variety of occasions over the past few years including training courses, advice surgeries and tailored support through new futures bucks.

This has resulted in them:

- Finding a contact to provide them with a new website and Facebook profile free of charge
- Successfully approaching FareShare to supply refreshments for their activity sessions
- Developing a Trustee Handbook and relevant policies and procedures to ensure robust governance and make sure they are ready to recruit new trustees
- Developing a volunteer strategy to recruit and retain more volunteers to help with activity sessions

Trustee Fran West explains how Community Impact Bucks have helped.

“They’re my first go-to when I have questions or queries as I can always find some help or be directed to someone who can provide me with the help I need. For a charity our size, the support we’ve had has been perfect and will help us develop.”
